## **CRUSHED ICE SWATCH**

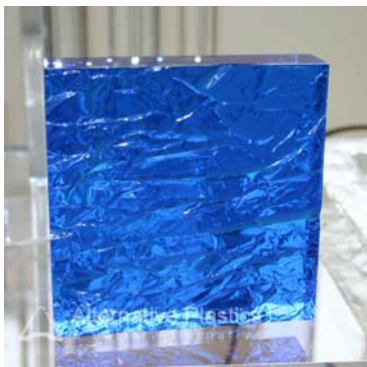

Here you can see our crushed Ice acrylic sheet which is available in 6mm thickness.

Although the sheet is normally only available in clear, other colours can be produced. (Minimum order quantity would apply).

Clear crushed ice can also be laminated over coloured sheet and block to create other colour effects

This sheet is great for creating textured displays and also can be used for obscured glazing.

In this photo some Crushed Ice sheet was specially manufactured in a transparent blue.

The sheet was then laminated onto clear block creating an illusion that the entire block is blue when viewed through the front or back.

Crushed Ice Sheets available in the following panel sizes:

- 3020 x 1520 x 6mm

Alternatively, we can offer a cut to size service to your specification.

**SAMPLES AVAILABLE ON REQUEST**
