ALTERNATIVE PLASTICS LTD

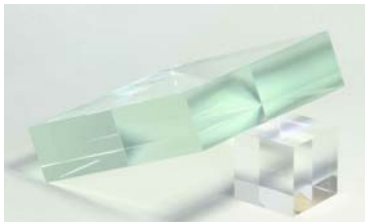

## GREEN EDGE / SILICON SWATCH

Here are samples of our green edge sheet or sometimes referred to as "silicon". The sheets here are shown with sawn cut edges.

The sheets appear visually clear and colourless when you look through them, but have the look of green glass at the edges.

The edges can easily be polished to a glossy finish.

Here a sample of green edge is shown resting on a cube of clear acrylic for comparison.

Both the cube and green edge block have been given our perfect polished finish.

Green edge sheet and thick sheet are available in the following panel sizes:

- 3050 x 2030
- 2030 x 1520

Alternatively, we can offer a cut to size service & price for the piece you want.

Available in the following thicknesses:

- 6mm
- 10mm
- 12mm
- 15mm
- 20mm
- Other thicknesses up to 100mm are possible to order - minimum order quantity may apply.

Please note this is not "fluorescent" material, or "edge lit". It will not fluoresce in UV light.

**SAMPLES AVAILABLE ON REQUEST**
